

Enterprise Performance Management Software

serving Clear Path OS 2200 systems

TeamQuest MSAR for Clear Path OS 2200 Systems

Control Mass Storage and Maintain Your 2200 Series System

The TeamQuest Clear Path OS 2200 Systems Software family includes products in several categories:

Performance Analysis and Capacity Planning, Modeling, System Management, Tools and Utilities

TeamQuest MSAR (MSAR) is a mass storage analysis and relocation program for ClearPath and 2200 Series systems. It helps you minimize access times and balance I/O traffic. By strategically placing files and balancing loads, queue length shortens and system performance improves.

Display File Information from the MFD

- Create reports and file lists by entering selection parameters and options
- Choose many combinations of file directory fields through a flexible, parameter-driven program

Generate Machine-readable Reports

- Save data from reports to a machine-readable file
- Process data from reports in other programs

View Allocation Maps

- View maps of the locations of the files on mass storage devices
- View storage allocation information

Control File Placement

- Move existing files and file fragments to the best possible location
- Allow users to place new files on the most efficient storage device
