

TeamQuest MSManager for Clear Path OS 2200 Systems

Minimize System Log File Processing

The TeamQuest Clear Path OS 2200 Systems Software family includes products in several categories:

Performance Analysis and Capacity Planning, Modeling, System Management, Tools and Utilities

TeamQuest MSManager (MSManager) is a mass storage solution that provides a full range of mass storage control and maintenance features for ClearPath and 2200 Series systems. With it, you can ensure that the most frequently accessed files are always available and minimize ROLOUT and ROLBAK runs.

Analyze Audit Trails

- Identify missing files by comparing the database to the master file directory
- Pass information to Symbolic Stream Generator (SSG) skeletons, FAS, or other software utilities

Maintain and Report on Online Database

- Create and update historical files to produce reports
- Add and delete data from the historical file

Organize and Manage

- Organize fixed pools of disks and removable disk files
- Manage mass storage easily with flexible directory reporting, directory altering, and disk capacity managing facilities

Automate Individual Sites

- Automate mass storage management procedures and practices at each site
- Set different criteria for each file on the system
- Stage implementation
