

Enterprise Performance Management Software

serving Unisys MCP Systems

TeamQuest Extended NAP Probes for Unisys MCP Systems

Observe the Performance of Your Systems

The TeamQuest Unisys MCP Systems Software family includes:

TeamQuest Model, TeamQuest SMFII, TeamQuest Probes, TeamQuest CMF.Disk, TeamQuest Extended NAP Probes, TeamQuest PMPlus, and TeamQuest Express.

TeamQuest Extended NAP Probes

(NAP Probes) provides three data collectors for NAP systems. NAP Probes is an add-on package that supplements the data provided in TeamQuest SMFII, a performance analysis package that collects and displays system resource information for hardware components and software applications. TeamQuest SMFII offers a wide range of statistics, including detailed information on CPU, memory, I/O, disk, network, task, and operating system internals. NAP Probes adds the following performance statistics.

Detailed NAP Statistics

| Probe | Data Collected |
|--|--|
| Telephony Services Platforms | Collects information about each board in each TSP used by the NAP system. Data collected includes status of the TSP board, type of TSP board, and number of ports in use for the TSPboard. You can view statistics in real-time and history reports. |
| Telephony Services Platform Boards | Collects information about each board in each TSP used by the NAP system. Data collected includes status of the TSP board, type of TSP board, and number of ports in use for the TSPboard. You can view statistics in real-time and history reports. |
| Telephony Services Platform Destination Point Code | Provides status information for the Telephony Service Platform Destination Point Codes(DPC) within the NAP system. You can view statistics in real-time and history reports. |
